EDITORIAL POLICY

The overriding criteria for publication are originality, high scientific quality, and interest to a multidisciplinary audience. Papers not sufficiently substantiated by experimental detail will not be published. Any technical queries will be referred back to the author, although the Editors reserve the right to make alterations in the text without altering the technical content.

The articles published in *Gene* represent the opinions and scientific findings of the authors. Whilst the publisher and editors of *Gene* make every effort to ensure the accuracy of all published matter, they can accept no responsibility or liability collectively or individually, for any erroneous, misleading or unintentionally damaging statements which may appear in the journal.

The Editors assume that all virus and cell strains, new isolates and mutants, described in papers published in *Gene* will be made freely available for distribution upon written request to all qualified members of the scientific community. If delays in strain distribution are anticipated or if the strains are available from other sources than the authors, this should be indicated in an appropriate footnote.

Papers and figures should be submitted in triplicate (one set of original figures ready for printer) accompanied by a letter of transmittal, in which authors may specify names of potential referees. If referees are specified, more than four names should be given.

Important:

In addition, send to the Editor-in-Chief: (a) a copy of the letter of transmittal, (b) a copy of the title page and summary, and (c) number of typewritten pages, figures, and tables. Do not submit manuscripts to the Editor-in-Chief.

Types of papers *Full-length papers* (not over 20 typewritten, double-spaced pages, including tables and figures) and *short communications* (not over a total of 10 pages). Papers longer than 20 pages, if accepted, might be published with delays. *Reviews* may be submitted after an invitation from the editorial board. *Letters to the Editor* concerning papers already published in the journal will be considered for publication in issues appearing 6 or 12 months after the original paper was published. They should be sent (at least 90 days before their scheduled appearance) to the Editor whose name appears on the original paper with a copy to the original author to give the opportunity to reply. *Restriction maps, new clones, and sequences.* A special type of short communication will be a presentation of a restriction map or a sequence derived by standard techniques. In such a paper, only a summary and the map or sequence should be presented with a very short description and only a short statement about the standard methods used, including pertinent references. However, when submitting it to any of the Editors, three copies of a detailed description of the experimental evidence should also be provided, as to permit proper refereeing. Such papers should carry the following footnote: "On request, the author(s) will supply a detailed experimental evidence for the conclusions reached in this short presentation".

Manuscripts should be in English, in double-spaced typing on one side of the sheet only and divided into sections headed: INTRODUCTION, MATERIALS AND METHODS, RESULTS, DISCUSSION, ACKNOWLEDGEMENT(S) and REFERENCES. Authors' full names, affiliations and telephone numbers should be included on the first page. Name, complete address and telephone number of the author to whom proofs are to be sent should also be given on the first page.

- **Important:** Manuscripts should be complete and technically correct; no alterations and/or additions can be accepted at proof stage.

Key words About six words or short phrases (not already used in the title) should be included just after the title.

Abbreviations should be specified in alphabetical order at the bottom of the title page.

Summary Each manuscript, including short communications, reviews and appendices, should start with a short summary.

Tables should bear a short descriptive title, a legend and/or footnotes identified by a, b, c, etc., and should be typed on separate sheets with double spacing.

Figures Line drawings (including graphs) should be drawn in black ink on white paper. Alternatively, sharp photoprints may be provided. Lettering should be large enough to permit photographic reduction. Half-tone illustrations may be included. They should be submitted as black and white prints on glossy paper and have as much contrast as possible. Minimum size of figures $4 \times 5''$ or 10×12 cm and maximum size $8 \times 10''$ or 20×25 cm. If figures are not to be reduced their format should not exceed $6 \times 9''$ or 16×23 cm. All legends should be typed on (a) separate sheet(s) of paper, with double spacing.

References should be assembled alphabetically on (a) separate sheet(s). They should be referred to by name and year (Harvard System). More than one paper from the same author(s) in the same year must be identified by the letters a, b, c, etc., placed after the year of publication. In the text, when referring to a work by more than two authors, the name of the first author should be given, followed by et al. When referring to unpublished papers, initials and name(s) of (all) author(s) should be given in the text. Literature references must accord with the following examples:

Cohen, S.N., Chang, A.C.Y., Boyer, H.B. and Helling, R.B.: Construction of biologically functional bacterial plasmids in vitro. *Proc. Natl. Acad. Sci. USA* 70 (1973) 3240–3244.
